Good morning!

I was interested in the pair of AI prime lights you had for sale in the Marketplace. Are they still available?

If so, how long did you use them for, and at what intensity? Is there anything about them that doesn't work/works funny?

Thanks in advance,

P.S: this is my first attempt at buying anything on R2R, so apologies for any confusing/rookie questions.

They are still available. They are the 13 HD ones not the 16HD. They are about 3 years old. They work as intended.

Gotcha. 3 years is a tiny bit older than I'd hoped; any chance you would take \$250 for the pair?

Thanks,

Would you be willing to do \$260 so I can cover shipping costs?

Totally! That seems fair to me. What's the best method of payment for you?

Thanks,

Sure thing! I'll hopefully do that around 4:00 pm when I get back from work.

Hey again, I'm just getting to setting up the lights I bought from you, and was wondering if you still had them linked to your account? I can't seem to get them to respond, and one of the things the AI website said was to make sure the previous owner had deleted the lights from their myAI account.

Thanks in advance,

I don't. Make sure you select AI-Fi when setting up

Do you mean the app? I was trying to set them up over the wifi. At the moment, the red indicator light is on and I cant seem to get them to respond (I can access them over wifi, but just cant make the lights turn on).

Thanks again for the help!
