

9 Gallon Mixed Reef

Growth rate: Great | Coloration: Great

Here are the water parameters you should be aiming for:

Salinity	Calcium	Magnesium	Alkalinity	Nitrate	Phosphate
34 ppt	450 ppm	1350 ppm	11.5 dKH	2 ppm	0.1 ppm

How to keep these parameters

Salt	Avg. cost for your tank size/month: USD2.25
Coral Pro Salt	Recommended weekly water change of 10%

Supplements	Usage
Foundation Elements	Avg. cost for your tank size/month: USD3.00
Calcium+ Foundation A	1.2 ml daily
KH/ Alkalinity Foundation B	3.7 ml daily
Magnesium Foundation C	0.4 ml daily
Trace Elements	Avg. cost for your tank size/month: USD0.75
Trace Colors A B C D	0.1 ml daily
Algae Prevention	Avg. cost for your tank size/month: USD0.25
NO ₃ :PO ₄ -X	0.4 ml daily
Coral Nutrition	Avg. cost for your tank size/month: USD1.25
Reef Energy Plus	1.6 ml daily

Test Kits	Usage
Calcium Marine Test kit	Once a week
pH/Alkalinity Marine Test kit	Once a week
Magnesium Marine Test kit	Every 2 weeks
Phosphate Marine Test kit	Every 2 weeks
Nitrate Nitrite Marine Test kit	Every 2 weeks
Seawater Refractometer	Once a week

Dosages are based on typical systems. Actual dosages should be calculated according to a measured consumption in your aquarium, based on weekly testing.
